**RE: Moffat Creek Trunk Sanitary Sewer Design, Cambridge, Ontario
Stage 1: Background & Stage 2: Assessment Final Report**

Dear Shari,

Please find in this package, your copy of the above named Final Report. A copy has been sent to the client and two copies shortly will be sent to the Ministry of Culture's Toronto office for archival purposes. This project is on a tight deadline for construction this spring, and it would be appreciated if you could review this report at your earliest possible convenience. FAC is recommending clearance, with a "no impact zone" for the early Historic Euro-Canadian site found within the Study Area, but well-away from the actual pipeline construction route as discussed in an earlier telephone conversation. If you have any questions concerning the report, please do not hesitate to contact me.

Sincerely,

Jacqueline Fisher
(FAC President)
