

CONTAMINATED SITES SCREENING QUESTIONNAIRE

(MOEE Guideline for use at Contaminated Sites in Ontario – June 1996 Guideline)

1. Does the application propose development on private services (septic system) or redevelopment on a site where private services either are or were used?

Yes No

2. Does the application involve lands or is it adjacent to lands where there is reason to believe that the lands may be contaminated due to historical land use?*

Yes No

Please specify: _____

* Possible offending uses can include: disposal of waste materials, raw material storage, residues left in containers, maintenance activities and spills, application of fertilizers. Some commercial properties such as gasoline stations, automotive repair garages, and dry cleaning plants have similar potential. The longer a property is under industrial or similar use, the greater the potential for site contamination. Also, a series of different industrial or like uses upon a site could potentially increase the number of chemicals which are present.

3. Does the application involve land or is it adjacent to lands where filling has occurred?

Yes No

4. Is the nearest boundary line of the application within 500m of the nearest boundary line of an operational/non-operational public or private landfill or dump?

Yes No

5. Are you aware of any underground storage tanks and/or buried waste on the property?

Yes No

6. Has an Environmental Site Assessment been or is one being prepared for the site?

Yes No

Note: Policies adopted by Cambridge City Council require the owner to certify that the site meets the criteria of the 'Guideline' for the proposed use before the application is accepted for processing and further the application will not receive final approval or may include holding provisions where site clean-up is required.

To the best of my knowledge, there are no other reasons to believe that the site is contaminated.
