

FIGURES

LIST OF FIGURES

Chapter 1	
Figure 1.1	Interrelationships of Watershed Characteristics
Figure 1.2	Schematic Diagram of Interactions between Land Use and Environment within a Watershed
Chapter 4	
Figure 4.1	Existing Conditions - Hydrologic Model Schematic
Figure 4.2	Comparison of Modelled and Gauged Flow Rates at Dundas Street
Figure 4.3	Existing Conditions Hydrograph - At the Municipal Boundary
Figure 4.4	Existing Conditions Hydrograph - At Regional Road 97
Figure 4.5	Existing Conditions Hydrograph - Upstream of Tributary
Figure 4.6	Existing Conditions Hydrograph - At Dundas Street/Highway 8
Figure 4.7	Existing Conditions Hydrograph - At Christopher Drive
Figure 4.8	Existing Conditions Hydrograph - At the Grand River/Highway 24
Figure 4.9	Existing Conditions 100-Year and Regional Water Surface Profiles
Figure 4.10	5-Year Mean Velocity Distributions - XS 1+065 and XS 2+085
Figure 4.11	5-Year Mean Velocity Distributions - XS 2+655 and XS 1+115
Figure 4.12	5-Year Mean Velocity Distributions - XS 1+730
Figure 4.13	Cross-Section A-B
Figure 4.14	Cross-Section C-D
Figure 4.15	Study Process For Identification of Key Wetland Functions and Dependencies
Chapter 5	
Figure 5.1	Post-Development Scenarios 1, 2 and 3 Model Schematic
Figure 5.2	Post-Development Scenario 4 Model Schematic
Figure 5.3	Outflow Hydrographs at the North Dumfries/Cambridge Municipal Boundary
Figure 5.4	Outflow Hydrographs at Regional Road 97
Figure 5.5	Outflow Hydrographs Upstream of Confluence with Tributary
Figure 5.6	Outflow Hydrographs at Dundas
Figure 5.7	Outflow Hydrographs at Christopher Drive
Figure 5.8	Outflow Hydrographs at Highway 24 / Grand River
Figure 5.9	Comparison of Existing and Post-Development 5-Year Velocity Distributions - XS 1+065 and XS 2+085
Figure 5.10	Comparison of Existing and Post-Development Regional Floodlines
Figure 5.11	Comparison of Existing and Post-Development 5-Year Velocity Distributions - XS 2+655 and XS 1+115
Figure 5.12	Comparison of Existing and Post-Development 5-Year Velocity Distributions - XS 1+730
Figure 5.13	Comparison of Existing and Post-Development 100-Year Floodlines

LIST OF FIGURES

(Continued)

- Chapter 6
- Figure 6.1 Comparison of Existing, Post-Development Scenario 4, and Controlled Post-Development Scenario 4 Hydrographs (2-Year Rainfall Event)
- Figure 6.2 Comparison of Existing, Post-Development Scenario 4, and Controlled Post-Development Scenario 4 Hydrographs (5-Year Rainfall Event)
- Figure 6.3 Comparison of Existing, Post-Development Scenario 4, and Controlled Post-Development Scenario 4 Hydrographs (100-Year Rainfall Event)
- Figure 6.4 Comparison of Existing, Post-Development Scenario 3, and Controlled Post-Development Scenario 3 Hydrographs (2-Year Rainfall Event)
- Figure 6.5 Comparison of Existing, Post-Development Scenario 3, and Controlled Post-Development Scenario 3 Hydrographs (5-Year Rainfall Event)
- Figure 6.6 Comparison of Existing, Post-Development Scenario 3, and Controlled Post-Development Scenario 3 Hydrographs (100-Year Rainfall Event)
- Figure 6.7 Comparison of Existing, Post-Development Scenario 4 and Controlled Post-Development Scenario 4, 5-Year Velocity Distributions, XS 1+065 and XS 2+085
- Figure 6.8 Comparison of Existing, Post-Development Scenario 4 and Controlled Post-Development Scenario 4, 5-Year Velocity Distributions, XS 2+655 and XS 1+115
- Figure 6.9 Comparison of Existing, Post-Development Scenario 4 and Controlled Post-Development Scenario 4, 5-Year Velocity Distributions, XS 1+730
- Figure 6.10 Conceptual Artificial Wetland Design
- Figure 6.11 Moffat Creek Watershed Plan - Southeast Galt Community Process Coordination Chart
