

CITY OF CAMBRIDGE
CLASS ENVIRONMENTAL ASSESSMENT
STORMWATER MANAGEMENT MASTER PLAN
NOTICE OF PUBLIC INFORMATION CENTRE

The City of Cambridge has initiated a City-wide comprehensive Stormwater Management Master Plan to develop plans and strategies to manage the City's infrastructure related to flooding and stormwater quality. The study will assess existing drainage infrastructure, identify deficiencies, assess management alternatives and develop an implementation plan for the management of stormwater in Cambridge. The Stormwater Management Master Plan will establish a set of priority - based recommendations, leading to Municipally - led capital works to address flood risk and stormwater quality issues throughout the City. Once the problems are fully documented, a set of alternative solutions will be evaluated and presented to the Public and Agencies for comment at various points throughout the study.

The study will be conducted in compliance with Section A.2.7 Master Plans, as defined in the Municipal Engineers Association "*Municipal Class Environmental Assessment*," (June 2000) which will address Phases 1 and 2 of the Class Environmental Assessment Process. A key component of the study is consultation with stakeholders (public, landowners and regulatory agencies).

Two Public Information Centres (PICs) will be held to provide interested parties with an opportunity to review and discuss issues related to the project. The first PIC is scheduled for:

Thursday November 29, 2007
Toyota Room, Cambridge Centre for the Arts
60 Dickson Street, Cambridge
5:00 p.m. to 7:00 p.m.

Those attending the first PIC will have the opportunity to meet with the Project Team, review the study scope and discuss issues related to the project, including background information, local problem areas and environmental considerations.

If you are unable to attend the PIC but have specific comments related to this project, please contact either of the following:

Ms. Cathy Robertson, P.Eng., PTOE
Director of Engineering Services
City of Cambridge
