

CITY OF CAMBRIDGE
CLASS ENVIRONMENTAL ASSESSMENT
STORMWATER MANAGEMENT MASTER PLAN
NOTICE OF STUDY COMPLETION

The City of Cambridge has completed a City-wide comprehensive Stormwater Management Master Plan to develop plans and strategies to manage the City's infrastructure related to flooding and stormwater quality. The study involved an assessment of existing drainage infrastructure and deficiencies, as well as management alternatives leading to an implementation plan for the management of stormwater in Cambridge. The Stormwater Management Master Plan has established a set of priority - based recommendations, which will lead to future capital works and maintenance programs to address flood risk and stormwater quality issues throughout the City.

The study followed phases 1 and 2 of the "*Municipal Class Environmental Assessment*" (MCEA) and addressed the needs and justification at a broad level. The main components of the Master Plan are listed below. More detailed studies for each of the projects included in the Master Plan will be done at a later date following the MCEA process.

<u>Project</u>	<u>Status</u>
Routine Annual Maintenance of SWM Facilities	No Follow-up EA Required
Sediment/Vegetation Removal and Replanting within SWM Facilities	Schedule A
Facility Rehabilitation at End of Design Life	Schedule A+
Storm Sewer Replacement	Schedule A
Design and Construction of Retrofits for Stormwater Quality	Schedule B
Replacement of City's Hydraulic Structures (bridges and culverts)	Schedule B

The Stormwater Management Master Plan has been prepared and is available for public review at the locations listed below as well as on the City's website at <http://www.cambridge.ca>:
