

POTHOLE REPAIRS

The City of Cambridge's Public Works Division continues to work hard to repair potholes. By using the **Pothole Hotline** you are helping us help you, and we appreciate all the information that you are able to provide us.

If you encounter a portion of road that needs a pothole filled, please call the City's **Pothole Hotline at 519.740.4671**

We ask that you speak clearly, leave your name and phone number and as detailed a description as possible (either use the closest house number available, or if that is not possible, a location between two cross streets, as well as which lane the pothole is located in - if there is more than one lane on that particular roadside). ie. "Franklin Blvd. between Avenue Rd. and Glamis Rd. in the southbound curb lane"

By providing as much information as possible our Public Works' team is able to repair the problem quickly and efficiently. Thank you for your continued input.
