LOWEST OR ANY PROPOSAL NOT NECESSARILY ACCEPTED

John Avery, CPPB
Manager of Purchasing & Inventory

INTRODUCTION

The purpose of this proposal is to select a qualified vendor to work in partnership with the City to provide the City of Cambridge's diverse fleet with various maintenance and replacement parts for vehicles, heavy trucks and miscellaneous equipment, to the Fleet Services main facility at 1310 Bishop Street, as and when required. The current equipment fleet list is included with this proposal for your reference – as Appendix A. The City of Cambridge owns and operates an extremely diverse and wide array of vehicles and equipment required to meet operational demands. A small inventory of common and fast moving parts is maintained, while non inventory parts are ordered as needed. The inventoried parts are approximately 600 line items; a sampling is in the pricing component of this proposal as Appendix B. A complete list of inventoried parts is available on request.

This proposal will cover a period of three (3) years commencing from the date of the award, with the option to renew for two (2) consecutive one (1) year terms.

Bidders are to provide a price structure (discount on dealer, jobber, cost plus etc.) on all product lines and manufacturers for items listed in the Standard Product Lines section. The discounts proposed are to remain firm for the duration of the contract. Current catalogues and the manufactures printed price list bid are to be included.

Proposals should include detailed options or recommendations that can be offered, that will provide cost savings and efficiencies to the auto parts supply, delivery and stock process.

SCOPE OF WORK

The City of Cambridge's goal is to determine potential savings with respect to the business functionality of the successful supplier's system as well as provide the cities vehicle fleets with the best standard of auto, truck and equipment maintenance and repair products at the lowest acceptable price. It is anticipated that proponents will provide innovative alternatives in their proposal, with respect to ordering efficiencies and cost savings relating to their ordering/inventory system(s).

Additional value added services will also form part of the City analysis. Proponents are invited to submit all value added service details as a separate attachment to their response.

MANAGEMENT OF CONTRACT

The successful supplier will be responsible for the management of the contract. This will include overseeing the day-to-day operation of the accounts, and a telephone contact to provide timely responses to any orders or inquiries that may arise.

To facilitate customer-auditing, vendor must be able to provide as a minimum, on request, a detailed listing of all items requisitioned by the ordering department, branch, section or division during a specified time period(s). This listing must include as a minimum, the stock number, description and cost of each item, and the name of the person or specific department that placed the order(s).

DELIVERY OF GOODS

The successful supplier shall be responsible for delivery of all materials ordered under contract to the designated locations within the City at no additional cost. Parts ordered, require a delivery time of no more than two hours. Proponents are to offer stock delivery/pickup options available during non-business hours if required (i.e. major snow events).

The successful supplier will be required to make all deliveries for each order received to the designated location(s). The City may require multiple location deliveries. The successful supplier will be required to deliver as advised by the requisitioner.

STANDARD PRODUCT LINES

Parts supplied under this contract shall be as specified and shown in the successful supplier's catalogue, substitutions will not be permitted.

The products lines that require pricing (but not limited to) are:

Auto Filters

Lighting

Oils & lubricants

Ignition

Wipers

Spark Plugs

Rubber products

Bidders are encouraged to offer other product lines that would be beneficial to the City in their proposal. Please include literature and a price structure for these additional product lines.

The City reserves the right to request and, upon request, the successful supplier shall submit samples of materials offered for testing purposes at no cost to the City. Such samples shall be clearly identified as to successful supplier, and will be returned where not consumed or destroyed during testing.

QUALITY

All material purchased under this contract must meet or exceed commonly accepted industry standards as to quality of material and workmanship and must be warranted as such.

Any manufacturer's names, trade names, brand names or catalogue numbers listed are for the purpose of establishing and describing general performance and quality levels, unless specified otherwise. Such references are not intended to be restrictive and bids are invited on approved alternative products. It is the bidder's responsibility to name such produce and prove to the city that is equal in performance and quality. The City shall be the sole judge concerning the merits of bids submitted.

All materials found to be inferior, in the opinion of the City, must be returned to the successful supplier for full purchase credit at no additional cost to the City.

REQUISITION AND ORDERING INSTRUCTIONS

The successful supplier shall be responsible for conducting at least one instructional seminar, annually to introduce and implement their ordering/billing system.

The successful supplier will also be responsible for conducting refresher training sessions and new product introductions to incumbent staff as required.

Samples of a catalogue, material requisition, monthly summary statements, back order reports, credits, return of goods and available management reports must be submitted with the tender.

SERVICE LEVEL

The successful supplier shall indicate the normal level of service offered; for example, the delivery time, percent of complete orders and the time of delivery.

Successful supplier is to provide contact method(s) available for customer service inquiries.

PAYMENT

The preferred payment method for this contract will be by City Purchasing Card (VISA)

PRICE SCHEDULES

Bidders are to provide a discount based on a manufacturer's current published price list for all products offered in their proposal. Your proposal must include current product brochures and price lists and indicate the proposed firm discount for each.

PRICING

For comparison and evaluation purposes, bidders must price the list of parts shown in Appendix B using the proposed manufacturers price lists and discount offered.

All price changes must result from a proven manufacture increase only. A 30 day notice of same will be required by the City before it can be considered.

In the event that suitable price increases cannot be justified, the City reserves the right to cancel the contract upon 60 days' written notice and recall tenders.

REGULAR ORDERING PROCESSING

It is the intent that the primary means of placing orders will be the City's Purchasing Card system (VISA). The City purchase orders may also be used. Indicate in your proposal if your company can accommodate this ordering preference.

DELIVERY ADDITIONS

Throughout the period of the contract, the City reserves the right to add or delete delivery locations or pick up points.

DELIVERY OF MATERIAL

The successful supplier shall deliver all material to pre-determined locations as ordered by the city representative. All deliveries shall be made by successful supplier's own vehicles for the entire term of the contract. The successful supplier shall be responsible for securing proof of delivery in the form of a signature.

BACK ORDER OR SUBSTITUTION

Where the successful supplier is unable to fill a requirement from stock, all items available shall be shipped, and unavailable items must be entered as a back order. Back orders written up by the successful supplier must cross reference the original requisition/invoice number. In no case must the total quantities shipped exceed the quantity indicated on the original requisition.

The successful supplier must then contact the requisitioner to advise them of the expected delivery date or to obtain agreement on a substitution or cancellation.

Where a substitution is acceptable, the successful supplier must correct the stock number and description on the requisition to agree with that of the substituted material, indicate the authority for the substitution, delivery of material and consider the order complete.

NON-ASSIGNMENT

Neither this contract nor any work to be performed under this contract or any part thereof may be assigned by the contractor without the prior written consent of the City. Such written consent however shall not under any circumstances relieve the contractor of its liabilities and obligations under this contract and shall be within the sole and unfettered discretion of the City. This shall include but not be limited to delivery services.

VERBAL INSTRUCTION OR SUGGESTION

The City will assume no responsibility for verbal instruction or suggestion. All official correspondence in regard to the specifications must be directed to and will be issued by the Purchasing Division in the form of an Addendum.

IN CASE OF DISPUTE

In case of dispute as to whether or not an item or service quoted or delivered meets specifications, the decision of the Purchasing Division for the City of Cambridge shall be final and binding on both parties.

QUALITY AND VALUE

The successful bidder shall provide a good standard of service and value to the City who shall be the sole judge of the adequacy of such service and value, with power to order such changes as the City, in its discretion, may deem desirable.

PROPOSAL EVALUATION CRITERIA & WEIGHTED FACTORS

The following evaluation criteria, outlines the broad specifications for the proposed contract. The criteria used for assessing this tender will be as follows:

EVALUATION CRITERIA	CRITERION WEIGHT
<u>Price</u> <ul style="list-style-type: none">• Lowest Total Acceptable bid will be awarded full points. (35)<ul style="list-style-type: none">○ Lowest price will be determined as the sum of prices listed in Appendix B, and estimated quantity usage.• Discount off Catalogue Items.
