## **PROCESS:**

An application for a Zoning By-law and/or Official Plan amendment generally encompasses the following steps:

1. Pre-submission consultation and review of the proposed application by the Pre-consultation Committee. The committee will notify the applicant of any additional materials (i.e. reports or studies) that must accompany their application.
2. The formal application is reviewed by Development Planning staff to ensure all prescribed information and the required fee has been provided. The applicant will be notified, in writing, whether the application is considered 'complete'. Instructions regarding posting the Development Application Notification Sign on the property will be sent to the applicant at this time.
3. If the application is complete, a "Notice of Application" regarding the requested Official Plan and/or Zoning By-law Amendment will be circulated to landowners within 120 metres of the subject land and various Departments and agencies for comment. A notice will also be posted in a local newspaper.
4. A "Public Meeting" will be arranged by Development Planning staff to be held at the next appropriately available meeting of the Planning and Development Committee. The applicant is expected to attend this meeting to present the proposal and address any questions or concerns that may arise. Notice of this meeting will be in the same manner as, and may be combined with, the "Notice of Application" as described above.
5. The public meeting matters are referred back to City Staff and agencies for review.
6. A staff report containing a recommendation will be prepared. A copy of this report will be emailed to the applicant prior to the review by the Planning and Development Committee.
7. The Planning and Development Committee will consider the proposal and the staff report and will make recommendations to the Council of the City of Cambridge. Alternatively, Council could refuse or defer the application to a subsequent meeting.
8. After the amending by-law for Zoning By-law amendments has been enacted by City Council, notice of passing of the by-law is given to landowners and various public agencies and there is a 20 day appeal period commencing the day after this notice of passing of the by-law is given. During this period, an appeal of Council's decision may be made to the Local Planning Appeals Tribunal. Should no appeal be lodged, the amending by-law is deemed to have come into force as of the date of passing of the enacting by-law. Official Plan amendments are approved by the Region of Waterloo. Zoning By-law amendments which are tied to an Official Plan amendment are passed only after the Official Plan amendment has been approved by the Region and the appeal period has passed.

**Development Application Notice Sign(s):**

**CONTAMINATED SITES SCREENING QUESTIONNAIRE**

City of Cambridge Procedure for Contaminated Sites Redevelopment 2009

Does the application involve lands or is it adjacent to lands where there is reason to believe that the lands may be contaminated due to historical land use? Please specify: _____	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Does the application involve land or is it adjacent to lands where private or regional land filling has occurred?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Is the nearest boundary line of the application within 500m of the nearest boundary line of an operational/non-operational public or private landfill or dump?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Are you aware of any underground storage tanks and/or buried waste on the property?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Has an Environmental Site Assessment/Record of site condition been prepared for the site?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>

\*Possible offending uses can include: disposal of waste materials; raw material storage; residues left in containers; maintenance activities and spills; and/or application of fertilizers. Some commercial properties such as gasoline stations, automotive repair garages, and dry cleaning plants have similar potential. The longer a property is under industrial or similar use, the greater the potential for site contamination. Also, a series of different industrial or like uses upon a site could potentially increase the number of chemicals which are present.

**Note:** Procedure adopted by Cambridge City Council require the owner to certify that the site meets the criteria of the Provincial Brownfields Regulation for the proposed use before the application is accepted for processing and further the application will not receive final approval or may include holding provisions requiring a Record of Site Condition and additional application to remove the holding.

To the best of my knowledge, there are no other reasons to believe that the site is contaminated.
