<b>CONTAMINATED SITES SCREENING QUESTIONNAIRE</b>	
City of Cambridge Procedure for Contaminated Sites Redevelopment 2009 (As per Official Plan Policies)	
Does the application propose development on private services (septic system) or redevelopment on a site where private services either are or were used?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Does the application involve lands or is it adjacent to lands where there is reason to believe that the lands may be contaminated due to historical land use? Please specify: _____	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Does the application involve land or is it adjacent to lands where private or regional land filling has occurred?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Is the nearest boundary line of the application within 500m of the nearest boundary line of an operational/non-operational public or private landfill or dump?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Are you aware of any underground storage tanks and/or buried waste on the property?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Has an Environmental Site Assessment/Record of site condition been prepared for the site?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>

\*Possible offending uses can include: disposal of waste materials; raw material storage; residues left in containers; maintenance activities and spills; and/or application of fertilizers. Some commercial properties such as gasoline stations, automotive repair garages, and dry cleaning plants have similar potential. The longer a property is under industrial or similar use, the greater the potential for site contamination. Also, a series of different industrial or like uses upon a site could potentially increase the number of chemicals which are present.

**Note:** Procedure adopted by Cambridge City Council require the owner to certify that the site meets the criteria of the Provincial Brownfields Regulation for the proposed use before the application is accepted for processing and further the application will not receive final approval or may include holding provisions requiring a Record of Site Condition and additional application to remove the holding.

To the best of my knowledge, there are no other reasons to believe that the site is contaminated.
