### **To Property Owners and Residents:**

#### **Re: Todd St and Haddington St Reconstruction, City of Cambridge (Contract T21-94)**

The City of Cambridge will be proceeding with the Reconstruction of Todd St from Water St N to End and Haddington St from Dundas St N to Samuelson St.

Reconstruction will include the replacement of all underground utilities and surface works including: sanitary sewers, storm sewers, watermains, services to property line, asphalt, curbs and sidewalks.

Sousa Concrete will be completing this work which is expected to begin on or about April 4, 2022. The Contractor will start by installing a temporary watermain, followed by removals of existing infrastructure and then the full reconstruction work will begin. The construction is planned to take approximately 130 working days to complete, which would be until approximately the end of October. Weather and other unexpected delays could extend the completion of the work.

To minimize disruption and facilitate access as much as possible, the reconstruction is planned to be completed in stages. The stages will generally be as follows:

- Stage 1 – Todd Street;
- Stage 2 – Haddington St

The City recognizes that some residents may have concerns with construction moving forward during the COVID-19 pandemic. Attached with this letter, and available on the City's construction website below are additional FAQ's surrounding construction and COVID-19. All notices and updates for the project will be provided through the City's website below.
