Forest Region – there are occurrences of a number of species that are common in more southern climates (often referred to as “Carolinian” species). There are also a southern extremity of the Great Lakes-St. Lawrence Forest Region, the Huron number of unusual habitat types in Cambridge such as alvar communities and rare natural places in the city. You will see evidence of the last glaciation as well as living species that have not been here about 10,000 years ago. The Cambridge Environmental Advisory Committee invites you to visit and appreciate the City’s natural heritage.

The Cambridge Natural Heritage Tour booklet offers detailed information on the 29 sites featured through the efforts of the Cambridge Environmental Advisory Committee, the Cambridge Environmental Advisory Committee, and the Cambridge Environmental Advisory Committee. The Cambridge Natural Heritage Tour is designed to give you an introduction to and appreciation of the City’s natural heritage. The tour includes visits to sites such as Cruickston Reserve, Moyer’s Landing, and Victoria Park. The tour also includes visits to sites such as Cruickston Reserve, Moyer’s Landing, and Victoria Park. The tour includes visits to sites such as Cruickston Reserve, Moyer’s Landing, and Victoria Park.
