

NOTICE OF STUDY COMPLETION

Dover Street Sanitary Pumping Station Municipal Class Environmental Assessment Schedule B

THE STUDY

The City of Cambridge has completed a Municipal Class Environmental Assessment (EA) Study to address upgrade and expansion requirements at the Dover Street Sanitary Pumping Station.

STUDY RECOMMENDATIONS

Through a rigorous evaluation process that included public engagement with local residents, Grand River Conservation Authority and Region of Waterloo, the City recommends the construction of a new control building on a new footprint within the existing site and the retrofit of the existing well.

THE PROCESS

The study was undertaken in accordance with all of the requirements of the Municipal Class EA process (October 2000, as amended in 2007, 2011 and 2015) for Schedule 'B' projects. The Class EA process included public and agency review at key milestones to elicit input, as well as one Public Information Centre.

A Project File which documents the study's planning process is available for public review at the Cambridge City Hall, 50 Dickson Street, Cambridge, Ontario, N1R 8S1 during regular business hours for a period of 30 calendar days, starting on July 13, 2018.

PUBLIC CONSULTATION

During the 30-day public review period, the public is encouraged to read the Project File and provide comments to the study's Project Managers at the addresses provided below.

If, after consulting with the City of Cambridge, you have significant unresolved concerns with the study, you have the right to make a written request to the Minister of the Environment and Climate Change (11th Floor, Ferguson Block, 77 Wellesley Street West, Toronto, Ontario, M7A 2T5) to appeal the study results – also known as a Part II Order request. The Part II Order request must be received by the Minister of the Environment and Climate Change during the 30-day review period and a copy of the request should be forwarded to the Director of the Ministry of the Environment and Climate Change's Environmental Approvals Branch (Director, MOECC Environmental Approvals Branch, 135 St Clair Avenue West, 1st Floor, Toronto, ON, M4V 1P5) and the City of Cambridge. If there are no outstanding concerns after the end of the public review period, the study will be considered to have met the requirements of the Municipal Class EA, and the project may proceed to implementation.
