MOVING TIME

Begin by making your way to Churchill Park, Water St. (Highway 24) entrance just before Myers Rd. at the south end of Cambridge. Before or after the ride, children can take advantage of the park's many facilities, including playground equipment, a splash pad, skateboard area, and even a rocket to climb.

From the parking lot (washrooms available) take the trail heading east into the park, past the Duncan McIntosh Arena toward Christopher Drive. Turn left at Christopher and follow the bike lane past Castlewood Place keeping right to join the Moffat Creek Trail toward Champlain Blvd. At Champlain turn right and follow the bike lane past the 4-way stop at Elgin St. Continue straight toward Franklin Blvd and keep right to take the Multi-Use Trail just before the round-about. Cross Myers Rd. at the next roundabout and continue south toward McQueen Shaver Blvd. (south boundary road). Stop to admire the contrast at the top of the hill showing where urban meets rural and on a clear day you can enjoy the view for many kilometers.

Continue to the bottom of the hill, with very little peddling required, and turn right before reaching Water St. to join the trail back toward the park. You will most likely see ducks and geese around the pond along the way, and a rabbit or squirrel might cross your path. Cross Myers Rd. and continue on the laneway into Churchill Park back to the starting point.

For those more adventurous and wishing a longer ride, you can continue on McQueen Shaver and cross the round-about at Water St. (Hwy 24) and veer right to follow the switch back path that joins up with the Rail Trail. Here you can go to Paris and beyond, but for another nice loop turn left on the Paris Trail, turn right at the Footbridge, turn right at West River Rd and continue toward downtown Cambridge. You can take the trail through Soper Park or take Water St. back to Churchill Park.
