

Carbon Monoxide Alarm Report

For

(Address)

All apartment suites (see attached form) have carbon monoxide alarms that have a fuel burning appliance in the suite, directly below, above or beside a service room with a fuel burning appliance or are directly below, above or beside a garage have been inspected to ensure proper operation and maintenance as outlined in subsection 6.3.4 of the Ontario Fire Code. Defective carbon monoxide alarms have been replaced and new batteries have been installed where necessary
